

Estudio dalgunhas das especies da flora e dos hábitats naturais vulnerables ou en perigo, posiblemente afectados polas 129 minicentraís que foron construídas ou solicitadas nos últimos anos na rede hidrográfica galega. As relacións código-especie atópanse na páxina 10 . Os códigos están entre corchetes se a especie é moi probable pero non está confirmada. Sinálanse co símbolo # as especies da lista II da Directiva 92/43/CEE.
